Founded in 1961, the **Academy for Educational Development** is an independent, nonprofit service organization committed to addressing human development needs in the United States and throughout the world. With headquarters in Washington, DC, and offices in Boston, MA, and New York, NY, and program offices in nearly 60 countries, our 1,950 staff have technical or program presence through 250 human and social development programs in all 50 states and serving 150 countries. AED is committed to building the capacity of individuals and institutions to become more self-sufficient in order to meet their own development needs.

**AMATEA**, LLC's core mission is to apply technology to reach under-served populations—Poor; Rural residents; Ethnic minorities; Women globally. AMATEA, LLC's team applies information and communication technology for development through solutions that offer access, capacity building, and, innovative applications: IT and leadership training; Case management software; Information sharing solutions; Cybercrime and cybersecurity solutions; E-learning, Web/Internet-based learning; Virtual reality training solutions; Wireless connectivity; Cybercafés & computer labs; and Locally relevant software.

**Circle Solutions, Inc.** (Circle), founded in 1980, is an employee-owned professional services firm committed to working with our clients toward a common goal of supporting healthier people and safer communities. Our talented staff provides the following services and products: Training and Technical Assistance; Research and Evaluation; Outreach and Promotion; Creative and Communication Services; Conference and Exhibit Management; Clearinghouses and Information Centers; Distribution, Warehouse, and Courier Services; and, Information Technology.

A professional services firm, **ESI** has supported Federal, State, and local organizations since 1990 by designing, developing, and operating programs that seek to: improve the health and well-being of all Americans; enrich the lives of children and their families through improved health, education, and social services; eliminate suffering from disease and injury through better medical care; and reduce the burden of healthcare costs. Our services: help promote the progress of medical and social services research; educate medical, mental health, and public health professionals about new and best practices; increase consumer and public awareness about health issues; motivate behavior change; and, build coalitions to support national health programs.

The **George Washington University School of Public Health and Health Services** (GW SPHHS) is part of The GW Medical Center, an internationally recognized interdisciplinary academic health center founded over 175 years ago. The GW SPHHS has seven academic departments: Environmental and Occupational Health; Epidemiology and Biostatistics; Exercise Science; Global Health; Health Services Management and Leadership; Health Policy; and Prevention and Community Health. The Department of Health Policy (DHP) is nationally and internationally known for its vast experience in program evaluation and assessments (both effectiveness and outcome), policy analysis, data analysis, evaluation studies and design, and provision of technical assistance. DHP conducts wide-ranging research into emerging health policy issues.

The **MayaTech Corporation** is a consulting and technical services company that focuses on pressing public health priorities. Our projects vary in size from large, multi-year contracts, to task orders, to short-term consulting assignments. We provide applied social science research and evaluation including: policy assessment and legislative analysis; program evaluation; data collection, management and analysis; information development and dissemination; technical assistance and training; information technology and systems integration; web design, and maintenance; conference and logistics management; and international development services.

Since its inception, **NCQA** has been a leader in health care quality assessment. NCQA's experience with evaluating a wide range of health care organizations and providers equips it to provide an unparalleled depth of expertise. NCQA is governed by a board of directors that includes employers, consumer and labor representatives, health plans, quality experts, policy makers and representatives from organized medicine to ensure independence in assessing and reporting on health care quality. NCQA is deeply committed to working with public agencies to drive health care improvement.

**SONA Consulting Inc.** is a woman-owned, 8a certified small business based in Silver Spring, MD. SONA has over eighteen years of experience in program evaluation, data collection, and statistical analysis of data. SONA has designed evaluation studies for projects funded by CDC, HRSA, City of Philadelphia Department of Health, and the Susan G. Korman Foundation. SONA has also constructed and field tested survey instruments, written survey protocols, trained interviewers as necessary, analyzed raw data for significance and developed final reports of results and recommendations. SONA is experienced in accessing databases from diverse sources, constructing databases, analyzing data using complex statistical techniques, and convening Expert Panels.
